Description

The Flamefast DS300 is a Single Station Brazing Hearth (a double station model is available). The heavy duty refractory base of the brazing hearth has an area of 0.4 square metres and is designed for minimum maintenance. The sides and rear of the hearth area are insulated to prevent flame spillage. The air supply for the RF80 torch, which delivers up to 80,000BTU, is provided by a single phase whisper quiet integral fan. A second, smaller, RF10 jewellery torch can be fitted to the brazing hearth to allow fine work to be carried out. All Flamefast RF torches have a single hand-wheel to give ease of flame control and a constant flame pattern over the range of flame sizes. The torch is ignited electronically. ENGM304
