Description

The CEA MATRIX 2200 HF 230v TIG Inverter is an innovative, high-performance and technologically advanced single phase power source. Advanced function digital control ensures perfect stability of the welding parameters thereby giving the highest quality welding in both TIG and MMA with any electrode. It is the perfect machine for welding maintenance applications. Other features include built-in Power Factor Correction, low energy consumption, high reliability when used with generator sets, Auto diagnostic feature for trouble shooting and many more.
